Dee and Claudia,

I have left Rick voice mail messages and sent an email and have not heard anything. I am sending Elliot Zenick an email now to see what he thinks about moving forward.

Dee and Elyana,

I have not seen anything from Rick yet on the U&O FIP, either in the Sharepoint or transmitted via email. Based on correspondence below with the Indian Country Oil and Natural Gas FIP workgroup folks from as late as this morning, he had been actively reviewing that document, making it a priority over the U&O FIP. Looks like he will be moving on to the U&O FIP today?

Jody says that Carissa at OAR will not be sending the U&O FIP on to Janet until they receive word of concurrence from OGC. I noticed Tod Siegel went on the Sharepoint and added some more comments, which I have tried to respond to. I am not sure what are protocol on this is supposed to be. If OGC is planning to send word to OAR on their concurrence, will we have the opportunity to send OAR a revised clean version that addresses those comments, or is Carissa just going to pass on the same version she received from us last week?

Thanks,

Claudia

Thanks,

Claudia

The good news is that my subsequent comments seem to have been saved at least on the version in my copy of word. In fact, you responded to one of my comments that appears on numbered page 106. The bad news is that when I try to save things back to SharePoint, I get a message that it cannot connect with the system. I'll keep trying, but I don't want to get too far along and then find out that my comments haven't been/cannot be saved to SharePoint. I'll let you know how things go. If I cannot work on this, I'll switch over to the U & O FIP at least for now.

Maybe I missed them – that's possible. Did you save every time before exiting? Did you ever get a warning that it wasn't saving your changes – I have gotten that, at which point I don't exit and just wait for the system to sort it out. And then try again.

I'm up to page 90 something, so I hope all of those changes haven't actually been lost.

I'll ask everyone not to sign on tomorrow until you're done. I see your changes now thru about p. 76.

Thanks.

Chris

That's what I thought, but something I read in the preamble made me question whether my understanding in that regard was correct. I'll try to track that down when I have time. Speaking of which, as I think you are aware, I continue to work my way through the document, but have run into a roadblock. First, the system said I couldn't work on a response because it was locked and then when I hit the update button to be sure my changes were saved and that I had the benefit of any changes other people had recently made, the system went into an as yet unending loop of trying to update. Hopefully, I can simply close the document and then reopen it without losing any of my changes, but welcome any input regarding the best way to proceed.

And they were required to get permits starting 9/2/14 – extensions have only been for true minors.
